

SECURITY THREAT LEVEL: HIGH

Across the 30-day enterprise auditing period, IOCHunt monitored 4 endpoints (GIRI, DEFSECON-PC01, LOQ, JOSHWA) and processed 11,529 real security events. 1,575 Critical threats and 124 High alerts were investigated. Fleet availability maintained a 100% continuous heartbeat baseline.

#INC-101

Suspicious Tool Execution: cmd.exe Spawned by svchost

P1 CRITICAL

INVESTIGATING

Host: DEFSECONE-PC01 | Analyst: Tier 2 Analyst | Detected: 2026-09-28 23:51 | Evidence Events: 14

Evidence: cmd.exe|PID:12268|Parent:svchost.exe|Signed:True|Level:Silent

#INC-102

Suspicious Tool Execution: rundll32.exe Spawned by svchost

P1 CRITICAL

INVESTIGATING

Host: DEFSECONE-PC01 | Analyst: SOC Lead | Detected: 2026-09-28 21:47 | Evidence Events: 11

Evidence: rundll32.exe|PID:20132|Parent:svchost.exe|Signed:True|Level:Silent

#INC-103

High-Volume DLP Directory Missing Trigger (1,017 Events)

P2

RESOLVED

Host: DEFSECONE-PC01 | Analyst: IT Compliance | Detected: 2026-09-28 16:27 | Evidence Events: 1017

Evidence: Continuous folder access check: D:\IOCHunt-Monitor\def-monitor\testing

#INC-104

Endpoint Agent Tamper Interception Anomaly

P1 CRITICAL

RESOLVED

Host: GIRI | Analyst: Security Admin | Detected: 2026-09-26 14:00 | Evidence Events: 402

Evidence: 402 repeated agent hook unregister & tamper signals intercepted

Prioritized SOC & IT Remediation Checklist

Actionable remediation checklist derived from period telemetry observations

- Forensic Process Triage: Inspect anomalous svchost child processes (cmd.exe PID 12268, rundll32.exe PID 20132) on endpoint DEFSECONE-PC01.
- DLP Policy Alignment: Reconfigure missing folder path D:\IOCHunt-Monitor\def-monitor\testing on DEFSECONE-PC01 to suppress false-positive alarms.
- Agent Tamper Security: Review 402 intercepted tamper events on machine GIRI and verify Tamper Protection integrity.
- Command Execution Review: Audit command-line execution volume (2,010 events) across GIRI, LOQ, and DEFSECONE-PC01.
